

SKIN and SUN Facts

- If a child receives severe sunburn, you have doubled their chance of getting skin cancer in their lifetime.*
- Skin Cancer is increasing 12% per year.
- Always reapply sunscreen when sweating heavily or after swimming.

*American Cancer Society

Your child's skin health is important to all of us here at the AS Children's Center. And since outdoor play is an integral component of our curriculum we support the daily application of sunscreen. We have purchased Rocky Mountain Sunscreen, a top quality sunscreen developed in Colorado for skiers to use at the Center. Rocky Mountain sunscreen is dedicated to children's year round sun protection. The chemicals listed below are used in Rocky Mountain sunscreen. Please review the list to ensure your child is not allergic to any of these standard ingredients.

SPF 30: Octyl Methoxycinnamate and 2-Ethylhexyl Salicylate.

Rocky Mountain Sunscreen is:

- Paba Free
- Non-greasy
- Non-sticky
- Fragrance free
- Bonding base
- Hypoallergenic
- Waterproof
- Moisturizing
- Aloe based
- Refillable
